Cell viability image grid

560 TIFF fields | 1,120 channel images | Five fields per grid page

ITERATION / BATCH	TIFFS	PAGES
Iteration 0 / Batch 1	30	2-7
Iteration 0 / Batch 2	30	8-13
Iteration 0 / Batch 3	30	14-19
Iteration 1 / Batch 1	30	20-25
Iteration 1 / Batch 2	25	26-30
Iteration 2 / Batch 1	30	31-36
Iteration 3 / Batch 1	40	37-44
Iteration 4	30	45-50
Iteration 5 / Batch 1	60	51-62
Iteration 5 / Batch 2	55	63-73
Iteration 6	30	74-79
Iteration 7	30	80-85
Iteration 7 Re-do	60	86-97
Iteration 8	40	98-105
Iteration 9	40	106-113

CHANNEL SELECTION

Standard two-plane TIFFs

Plane 1: blue (all cells / DAPI display).
Plane 2: green (live cells / FITC display).

Iteration 0 / Batch 1: six-plane TIFFs

Plane 2: blue. Plane 5: green.
Other stored planes are omitted.

Coverage

All 560 paired TIFFs are included.
Six single-image recovery TIFFs are excluded.

DISPLAY AND COMPRESSION

Linear brightness ranges are shared within each folder and channel (pooled 0.1st-99.9th percentiles).
Values outside the range are clipped; gamma is 1.0.
Colour is applied with blue and green lookup tables.
Full fields are preserved; images are reduced to 512 px on the long edge and compressed for a compact PDF.
No cell removal, segmentation or local enhancement.
Brightness is for display, not a viability measurement.

Open the bookmarks panel, or click an iteration/batch above, to navigate.
